Summary:

Summary

Full Stack Developer with 3 years of experience building and deploying production web applications at Hyderabad International Airport using React, Node.js and PostgreSQL on Azure. Handles development, testing, security clearance (SAST/VAPT) and 24/7 support, and uses AI coding tools daily.

Technical Skills

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3
- **Backend & Databases:** Node.js, Express.js, REST APIs, PostgreSQL, Prisma ORM, JWT Authentication, LDAP/Active Directory, SMTP
- **Cloud & DevOps:** Azure, AWS, Linux, Docker, Docker Compose, Nginx, Git, GitHub, DNS
- **Security:** SAST, VAPT remediation, RBAC, Rate Limiting, Secure File Uploads
- **AI & Tools:** Claude Code, OpenAI Codex, Prompt Engineering, Postman, VS Code

Professional Experience

GMR Group – Hyderabad International Airport Hyderabad, India

Full Stack Developer Aug 2023 – Present

- Delivered 3+ production web applications (React, Node.js, PostgreSQL) that digitized manual airport processes, owning requirements, development, testing, deployment and support in Agile/SDLC.
- Run SAST scans and share clean reports with the VAPT team, then remediate every observation until sign-off, so each application clears VAPT before go-live.
- Integrated LDAP/Active Directory login, SMTP email notifications and WhatsApp (Meta) messaging through third-party APIs.
- Deployed on Azure with Docker, Docker Compose, Nginx (TLS) and Linux; managed DNS and private/public network access.
- Provide support for live systems, troubleshooting production issues and using Claude Code and OpenAI Codex for faster debugging and refactoring.

Project Highlights:

Project Highlights

Lost & Found Management System *(Live, 24/7)* *Node.js, PostgreSQL, Docker, Azure*

- Replaced a manual phone/email process that took 15+ minutes of staff typing per request; passengers now raise requests themselves, removing staff data entry for 100% of online requests.
- Passengers track their request online and get WhatsApp and email updates, instead of calling the department for status.
- Every action on an item is now recorded with who did it and when, giving 100% traceability where there was no audit trail before.
- Runs 24/7 with shift-wise airport staff, handling 20,000+ records in 6 months and about 100 public requests a day.

Education

B.Tech – Computer Science and Engineering, GMR Institute of Technology 2019 – 2023

CGPA: 7.56
